Summary

Full-Stack Developer (MERN/PHP) with 3+ year's experience delivering production-grade apps using Docker, JWT auth, and cloud platforms like Render. Improved app performance by 40% and increased SEO traffic by 25%. Skilled in scalable APIs, RBAC systems, CI/CD pipelines, and modern UX.

Skills

Frontend: JavaScript, TypeScript, React, CSS, Bootstrap, Tailwind CSS, HTML5, SEO

Backend: Node.js, Express, RESTful APIs, PHP, C#, JWT, Gemini API

Databases: MongoDB, MySQL, PostgreSQL

DevOps/Tools: Docker, Git, Redux Toolkit, EJS, Render, Netlify, CI/CD, AWS (EC2, S3 concepts)

Methodologies/Soft skills: Agile, OOPs, Teamwork, communication skill

Experience/Internship

Freelance - (Software Developer) | Feb 2024 - present

Montiyago (**KSA-based E-commerce** – Client Project) | Jul 2024 – Dec 2024

- Customized a Salla-based storefront for a Saudi client, enhancing UI responsiveness and layout using JavaScript and CSS.
- Delivered a production-ready site and collaborated closely with the client.

Other Projects:

- Optimized React/Node performance by 40% through code-splitting, reducing hosting costs.
- Deployed 5+ apps on **cloud platforms** (Render/Netlify) with Docker containers.
- Built **secure JWT role-based auth systems** reducing breaches by 90%.

Bytelinx - (Software Developer) | March 2023 - Feb 2024

- Developed full-stack solutions using PHP and MERN stack, **improving site performance by 20%**.
- Implemented SEO strategies like (e.g., CSS file minification, H-tag hierarchy) that increase **organic traffic by 25%**.
- Built an admin dashboard with role-based access control(RBAC) enhancing security.

Eversole - (Internship) | Oct 2022 - Feb 2023

- Developed CRUD API for a desktop application using .NET framework and C#.
- Collaborated with the development team to optimize application performance.

Projects

E-commerce Site: [\[Live-Demo\]](#) | [\[Github\]](#)

- MERN stack store with **Stripe payment**, handling **over \$10K in test transactions** with secure webhook validations.
- Implemented JWT auth + role-based access (Admin/User), encrypted data in MongoDB Atlas (<250ms queries).
- Created admin dashboard with Recharts analytics, cutting reporting time by 65% for business decisions.
- Enhanced frontend performance by 35% via **Redux Toolkit optimization**, and **MongoDB Atlas optimized queries**.

Cineverse – Movie Discovery Platform: [\[Live-Demo\]](#) | [\[Github\]](#)

- **Integrated TMDB + Gemini APIs for AI-enhanced movie insights** using prompt engineering, alongside JWT authentication and real-time search functionality
- Boosted data efficiency by **40%** using **React Query caching** and smart pagination, reducing server load significantly.
- Scored **80+ on Lighthouse** via lazy loading and responsive images, ensuring fast load times and full accessibility.

Cloudnotes – Secure Note-Taking App: [\[Live-Demo\]](#) | [\[Github\]](#)

- Developed a full-stack MERN application with JWT authentication and role-based access control.
- Implemented password **encryption using bcrypt with salt hashing**, ensuring 100% data security compliance.
- Stored user data in MongoDB Atlas with optimized queries, achieving <200ms response times.
- Designed responsive UI with Tailwind CSS, supporting cross-device accessibility.

Education

Superior University Lahore | 2018 - 2022 | Bachelor in Computer Science BS(CS)

Superior College Sialkot | 2016 - 2018 | Intermediate

Achievements/Certifications

Node.js & Docker | SimpliLearn | 2023

SEO Certification | WebExcels (Implemented strategies at Bytelinx, increasing traffic by 25%)

Languages

Urdu (Native) | **English** (Professional) | Arabic (basic learning)
